PROFILE SUMMARY

Motivated Full Stack Developer (Fresher) skilled in crafting dynamic UIs with React & Tailwind CSS and building robust APIs using Node.js, Express, and MongoDB. Experienced in implementing responsive design, authentication flows, database schemas, and modern development best practices. Eager to contribute to impactful projects and grow in a fast-paced engineering environment.

EDUCATION

B. Tech (Computer Science Engineering), Sharda University 2022–2026
AISSE (Class XII), CBSE – Manav Sthali School 2021-2022
AISSE (Class X), CBSE – Manav Sthali School 2019-2020

PROJECTS

Emotion Detection Using CNN – **Dec 2023**

Built a Convolutional Neural Network (CNN) to classify emotions from facial images.
Implemented data preprocessing, training/validation/test splitting, and performance evaluation.
Technologies: Python, TensorFlow/Keras, OpenCV.

Facial Recognition System **Feb 2024**

Designed and trained a recognition model integrating machine learning, deep learning, And database management.
Developed a face recognition model integrating machine learning and deep learning algorithms.
Implemented database management for storing face embeddings and designed a simple UI for interaction.
Technologies: Python, OpenCV, MySQL, Tkinter.

Unibro Platform (Group Project) **Nov 2024**

Created a university networking platform to help new students explore institutions, connect with faculty, and chat with peers. Focused on user interface, chat module, and role-based access features.
Technologies: React.js, Node.js, MongoDB, Socket.io.

Parivar Pehchan Patra Website (Internship Project) **May 2025**

Designed and developed the login page and family dashboard for a Govt. portal.
Used React.js, TailwindCSS, and inext18ts for multilingual UI support.
Collaborated with backend team for API integration and improved accessibility.

Leveraging Ai for Precise Cost Estimation (Published)- **Present**

Developed an AI-powered model to predict and estimate project costs with higher accuracy compared to traditional methods. Applied machine learning algorithms (e.g., regression, decision trees, ensemble models) to historical cost datasets for feature extraction and prediction. Used data preprocessing, normalization, and outlier detection to improve model reliability. Integrated predictive analytics dashboards for visualization of estimated vs. actual costs.
Technologies: Python, Pandas, Scikit-learn, Matplotlib, Jupyter Notebook. Outcome: Achieved a significant improvement in accuracy of cost predictions, enabling smarter decision-making for budget planning and resource allocation.

INTERNSHIP

Frontend Developer Intern – Primus Partners Solution Pvt Ltd **May 2025 – July 2025**

- Built Parivar Pehchan Patra Govt. website login page & family dashboard using React.js, TailwindCSS, and inext18ts translation tool.
- Collaborated with backend teams for API integration & UI consistency.
- Strengthened debugging and independent problem-solving skills.

SKILLS

- **Languages: Python, C , JavaScript, SQL, PHP**
- **Frameworks & Tools: React.js, Node.js, Express.js, Tailwind Css, CSS, Git/GitHub, VS Code, Restful API**
- **Databases: PostgreSQL, MongoDB, MySQL**
- **Soft Skills: Analytical Thinking, Team Collaboration, Ownership, Communication**

CERTIFICATIONS

- AWS – Amazon Web Services (30 hrs)
- Web Development Bootcamp
- SQL Oracle Course
- Java Oracle Course
- Python Bootcamp (Udemy)
- Node.js (npm, tools)

KEY STRENGTHS

- Strong analytical and problem-solving skills
- Excellent team collaboration and independent ownership
- Efficient debugging and attention to code quality
- Ability to adapt quickly to new technologies
